Even in these days of cheap literature, no

work has been offered to the Public on such moderate terms, and it is only by an extremely large sale that the publishers can hope to be re-

paid for their great expenditure. Although the publishers deem any further re-marks unnecessary, they cannot refrain from requesting the gentlemen of the Medical Profes. sion to compare the work, both as to price and style of execution, with any other that has appeared in this country, feeling assured that such comparison will prove the truth of their remark, as fine a quality as is used in any newspaper esthat it is the cheapest work ever offered to the American Public.

The publishers annex copies of a few letters of recommendation showing the esteem in which Quais's Anatomical Plates are held by the Medical Faculty in Philadelphia.

THE ORIGINAL DEPARTMENT those of the original work.

SAMUEL JACKSON, Prof. of the Institutes of Medicine in the University of Pennsylvania.

am glad to be able to state, that it is, in my opinion, the most splendid work of the kind that has appeared. Its authors are practised and excellent anatomists, and not less informed in the tions of the human frame as exposed on dissection, and are beautifully delineated.

Such a work, executed throughout with the same care as the lithographic plates which you exhibited to me, and under the supervision of so exhibited to me, and under the supervision of so able an anatomist as Prof. Pancoast, I should esteem a cheap and most valuable addition to our stock of anatomical works; and cannot ist except Sir Walter Scott, who has written in the our stock of anatomical works; and cannot ist except Sir Walter Scott, who has written in the doubt, that it would be eagerly sought after by English language. The purchase of original refresh his memory on important occasions.

> Walnut Street, Feb'ry 16, 1942. Gentlemen .- The coloured anatomical plates, ublished by Jones Quain, M. D., Professor of years, Anatomy in the University of London, are as accurate in all their delineations as they are splendid in their execution.

I consider them the most valuable work, upon the subjects they portray, ever offered to the medical profession, and the testimony of my private students is strong in their favor.
